

GENERAL TRAINING AND OCCUPATIONAL STANDARDS FOR DENTAL TECHNOLOGY

UNIT

DOSAM_9 Therapeutical devices (~~gnatho-orthopaedic devices, splints, wound sealing plates~~)

Summary of this unit

This unit focuses on the skills required for the planning, design, manufacture, assessment and repair of ~~gnatho-orthopaedic and other~~ therapeutical devices.

The trainee needs to know the causes of the dysfunctions and which measures are likely to remedy them. The trainee shall understand the basic principles of the various surveying methods and shall be familiar with the various types of therapeutical devices (~~for instance, the functional gnatho-orthopaedic devices and the gnatho-orthopaedic devices, adjusted and not adjusted, etc.~~), their functional ranges and the limited therapeutical possibilities inherent to treating such dysfunctions.

Moreover, the trainee shall be aware of the requirements of materials, shall master the technologies involved in manufacturing therapeutical devices and know the function and performance of ancillary parts and curved elements to be added.

The trainee shall possess the necessary skills to independently plan, design, manufacture and assess the adequate therapeutical device that will help remedy malocclusions and tooth anomalies on the basis of the instructions of the client.

Certification/ certificate¹

- Draft an allocation of tasks
 - o Project work
 - o Presentation of the results
- Develop and adopt assessment criteria

European logbook to record the training.

¹ To be defined
